

FEEDBACK From the Students (During the Final University Examination-2017)

Like previous years, this year (2017) also we distributed the **Feedback Forms** to all the students of the college during the final University Exam. Main purposes of such forms were to assess the functioning of the college, satisfaction of the students regarding the classes, functioning of the college office, college library and overall academic atmosphere of the college.

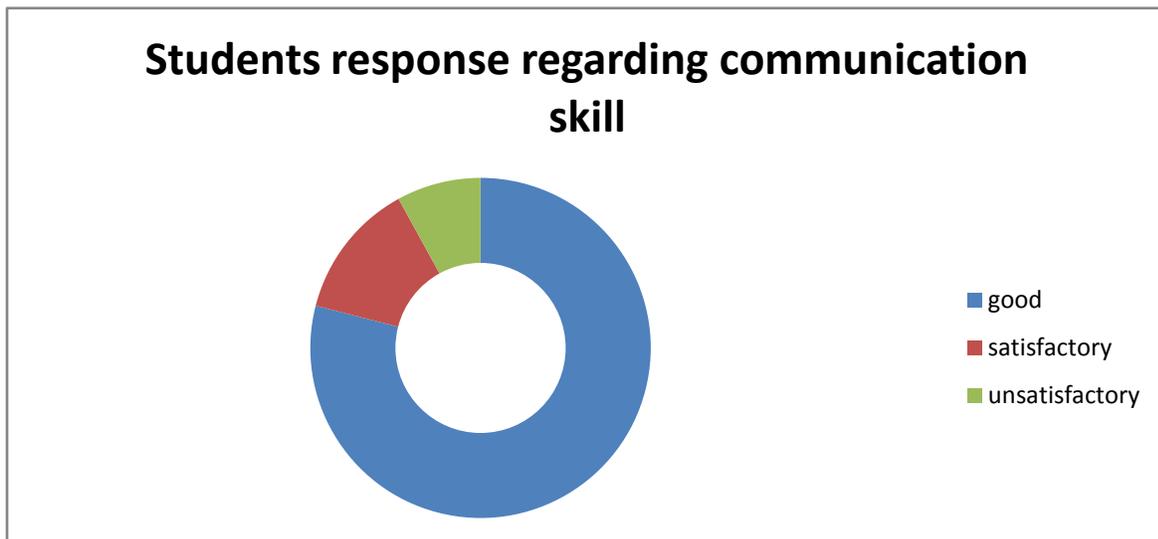

The 1st question of the feedback forms was` related to the ability of the teachers to make the students understand the subject clearly and from the feedback it is clear that 78% of students put their tick on good ,16% on satisfactory and only 6% on unsatisfactory . So it is clear that bulk of the students think that the teachers are efficient to make them understand the subject clearly .that can be shown by the following pie chart:

The 2nd question was motivation or interest provided by the teachers to the students. and in this regard 74% of students replied that the performance of the teachers are good, 9% satisfactory and 17% unsatisfactory .So we will have to take special care regarding this why almost one fifth of students are not satisfied . This is also being shown by the following bar chart:

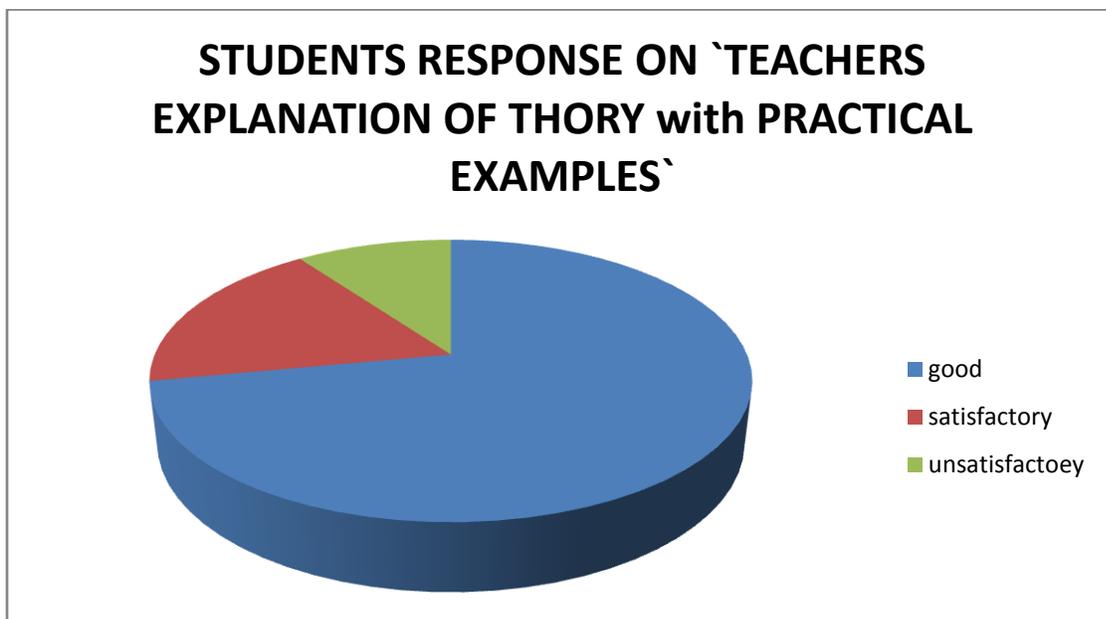

Regarding teachers communication skill 79% of students feel good, 13% satisfactory and remaining 8% are not satisfied. This is mainly due to the fact that most of the students come from Bengali Medium School and at the Honours level, where the medium of instruction is English, they fail to interact the teachers with their problems clearly. We must be careful in this case. This is also shown in the chart below:

Regarding the understanding the class lectures same result is being reflected. Students responses regarding teachers regularity and punctuality reflects that 87% of students pot tick on good, 8% on satisfactory and 5% on unsatisfactory.

On the question of Teaching according to the syllabus, the responses of students were mixed. 76% of the student's response good while 12% satisfied and 12% are not satisfied.

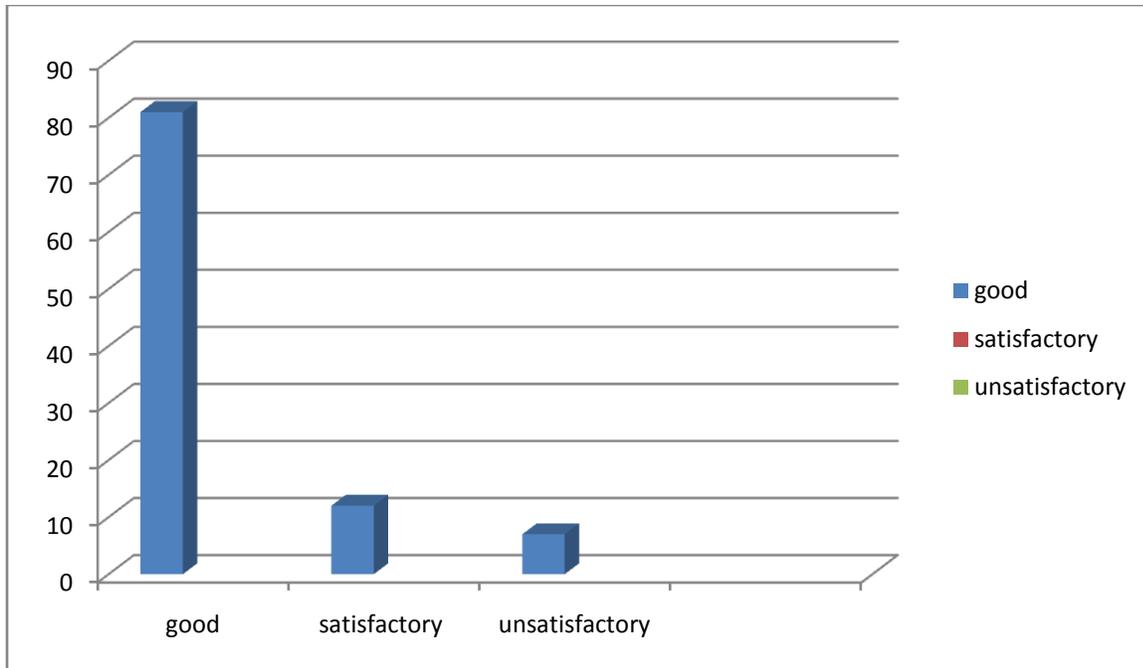

Regarding Teachers' explanations of the theory with practical examples, 72% of responses came in favor of good while 18% satisfactory and remaining 10 % unsatisfactory. This is due to the fact that in all cases it is not possible to correlate the theory with practical examples with stipulated time frame. This result is shown by the following figure:

On awareness about the course curriculum 76.8% responses were good, 14.4% satisfactory and 8.8% unsatisfactory.

Teachers interaction in and outside the class is very important for students especially for their carrier choice, all round physical and mental growth. In this field the responses of the students clearly shown that 71% responses were good, 18% satisfactory and 11% unsatisfactory.

Overall performance of the teachers includes punctuality of teachers, teaching according to the syllabus in planned stipulated time bound manner, communicative skill, etc. In this question the responses of the students shown that 81% of students said good, 12% satisfactory and 7% unsatisfactory.

In the question of teacher's attention to the problems of the students, 59% answered good, 32% satisfactory and 9% unsatisfactory.

Awareness about question pattern in the final examination, the student's responses reflected that 64% good, 17% satisfactory and 19% unsatisfactory. That is shown by the following figure:
